## **Nanotech Surface Solutions™ Seat Protector**

### Product Information

#### **Description**

- Water-based sealer for textile materials.
- Creates an invisible and long-lasting shield on the fiber surface creating hydrophobic properties.
- Once the shield has been created, textile surfaces develop anti-liquid stain properties.
- Protects vehicle seats & rugs from stains caused by coffee, wine, soda & other liquids.

#### **Suitable Substrates**

- Vehicle seats & rugs
- Vehicle textile surfaces

#### **Other Data**

- Spread rate: 10- 15 square metres/ liter
- The drying time: 24- 48 hours to completely cure
- Re-coat interval: Once the first coat is completely dry.
- Application temperature: minimum 5<sup>o</sup>C to 25<sup>o</sup>C.
- Shelf Life: 12 months in unopened container.

#### **Application**

- Stir contents before application.
- Make sure the surfaces are completely clean, dry and free from any prior cleaning agent residues.
- Apply a generous amount of product to the desired surface by using a sprayer. Make sure the surface is completely soaked.
- Let dry and test the liquid repellency properties of the surface by pouring water on to it. If water does not get completely repelled, repeat the above mentioned steps.

#### **Cleaning of Treated Surfaces**

- No aggressive or harsh chemicals will be needed to clean the treated surfaces since dirt and bacteria won't adhere to it.
- Biodegradable light cleaners should be used.
